

SAFETY DATA SHEET

SIEMENS

IMMULITE® C-Peptide Control Module

MSDS no.

PECM

1. Identification of the substance/preparation and company/undertaking

Identification of the substance or mixture

Product name : IMMULITE® C-Peptide Control Module
Product code : PECM; 10385589
Product type : Liquid.
Use of the substance/mixture : Diagnostic Agents

Company/undertaking identification

Manufactured/supplied : Siemens Healthcare Diagnostics Limited
Sir William Siemens Square
Newton House
Camberley
Frimley
Surrey
GU16 8QD
UK

Phone: +44 (0) 1276 696000
Fax: +44 (0)1276 696133

e-mail : dx.msds.healthcare@siemens.com

Emergency telephone number (with hours of operation) : +49 6131 - 19240; [24x7x365]

2. Hazards identification

The product is classified as dangerous according to Directive 1999/45/EC and its amendments.

Classification : Xn; R22
R52/53

Physical/chemical hazards : C-Peptide Control Modules PEC1, PEC2 & PEC3 Not applicable.

Human health hazards : C-Peptide Control Modules PEC1, PEC2 & PEC3 Harmful if swallowed.

Environmental hazards : C-Peptide Control Modules PEC1, PEC2 & PEC3 Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

Potentially biohazardous material.

See section 11 for more detailed information on health effects and symptoms.

Date of issue/Date of revision : 1/25/2013.

1/10

3. Composition/information on ingredients

Substance/preparation :

Ingredient name	CAS number	%	EC number	Classification
C-Peptide Control Modules PEC1, PEC2 & PEC3 sodium azide	26628-22-8	0.9	247-852-1	T+; R28 [1] [2] R32 N; R50/53
See section 16 for the full text of the R-phrases declared above				

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in section 8.

4. First-aid measures

First-aid measures

- Inhalation** : Move exposed person to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
- Ingestion** : Wash out mouth with water. Remove dentures if any. Move exposed person to fresh air. Keep person warm and at rest. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
- Skin contact** : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.
- Eye contact** : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.

See section 11 for more detailed information on health effects and symptoms.

5. Fire-fighting measures

Extinguishing media

- Suitable** : Use dry chemical, CO₂, water spray (fog) or foam.
- Not suitable** : None known.
- Special exposure hazards** : In a fire or if heated, a pressure increase will occur and the container may burst.

5. Fire-fighting measures

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. This material is harmful to aquatic organisms. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

Hazardous combustion products : No specific data.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. Accidental release measures

Personal precautions : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see section 8).

Environmental precautions : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material.

Small spill : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

7. Handling and storage

Handling : Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapour or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Storage : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

Packaging materials

Recommended : Use original container.

8. Exposure controls/personal protection

8. Exposure controls/personal protection

Ingredient name

Occupational exposure limits

C-Peptide Control Modules PEC1, PEC2 & PEC3

sodium azide

EH40/2005 WELs (United Kingdom (UK), 1/2012). Absorbed through skin. Notes: as NaN₃

STEL: 0.3 mg/m³, (as NaN₃) 15 minute(s).

TWA: 0.1 mg/m³, (as NaN₃) 8 hour(s).

Recommended monitoring procedures : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to European Standard EN 689 for methods for the assessment of exposure by inhalation to chemical agents and national guidance documents for methods for the determination of hazardous substances.

Exposure controls

Occupational exposure controls : No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Respiratory protection : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Hand protection : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Eye protection : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.

Skin protection : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Environmental exposure controls : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

9. Physical and chemical properties

General information

Appearance

Physical state : C-Peptide Control Modules PEC1, PEC2 & PEC3 Solid.

Colour : C-Peptide Control Modules PEC1, PEC2 & PEC3 Off-white.

Date of issue/Date of revision : 1/25/2013.

4/10

9. Physical and chemical properties

Important health, safety and environmental information

pH	: C-Peptide Control Modules PEC1, PEC2 & PEC3	Not applicable.
Boiling point	: C-Peptide Control Modules PEC1, PEC2 & PEC3	Not available.
Melting point	: C-Peptide Control Modules PEC1, PEC2 & PEC3	Not available.
Flash point	: C-Peptide Control Modules PEC1, PEC2 & PEC3	Not available.
Explosion limits	: C-Peptide Control Modules PEC1, PEC2 & PEC3	Not available.
Vapour pressure	: C-Peptide Control Modules PEC1, PEC2 & PEC3	Not available.
Relative density	: C-Peptide Control Modules PEC1, PEC2 & PEC3	>1
Octanol/water partition coefficient	: C-Peptide Control Modules PEC1, PEC2 & PEC3	Not available.
Viscosity	: C-Peptide Control Modules PEC1, PEC2 & PEC3	Not available.
Evaporation rate (butyl acetate = 1)	: C-Peptide Control Modules PEC1, PEC2 & PEC3	Not available.

Other information

Auto-ignition temperature	: C-Peptide Control Modules PEC1, PEC2 & PEC3	Not available.
----------------------------------	---	----------------

10. Stability and reactivity

Stability	: The product is stable.
Conditions to avoid	: No specific data.
Materials to avoid	: No specific data.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

11. Toxicological information

Potential acute health effects

Inhalation	: No known significant effects or critical hazards.
Ingestion	: Harmful if swallowed.
Skin contact	: No known significant effects or critical hazards.
Eye contact	: No known significant effects or critical hazards.
Acute toxicity	

11. Toxicological information

---	---	--	----------

Conclusion/Summary : Not available.

Biodegradability

Conclusion/Summary : Not available.

Other adverse effects : No known significant effects or critical hazards.

13. Disposal considerations

Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Hazardous waste : The classification of the product may meet the criteria for a hazardous waste.

European waste catalogue (EWC) : Hazardous waste
18 01 06* chemicals consisting of or containing dangerous substances
Non-hazardous waste
18 01 07 chemicals other than those mentioned in 18 01 06

Sodium azide may react with lead or copper plumbing to form highly explosive metal azides.

14. Transport information

International transport regulations

15. Regulatory information

EU regulations

Classification and labeling have been determined according to EU Directives 67/548/EEC and 1999/45/EC (including amendments) and take into account the intended product use.

Hazard symbol or symbols :

Harmful

Risk phrases : R22- Harmful if swallowed.
R52/53- Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

Safety phrases : S28- After contact with skin, wash immediately with plenty of water.
S35- This material and its container must be disposed of in a safe way.

Contains : **C-Peptide Control Modules PEC1, PEC2 & PEC3**
sodium azide

247-852-1

Date of issue/Date of revision : 1/25/2013.

15. Regulatory information

- Product use** : Industrial applications.
Europe inventory : Not determined.

16. Other information

- Full text of R-phrases referred to in sections 2 and 3 - United Kingdom (UK)** : R28- Very toxic if swallowed.
R22- Harmful if swallowed.
R32- Contact with acids liberates very toxic gas.
R50/53- Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
R52/53- Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

- Full text of classifications referred to in sections 2 and 3 - United Kingdom (UK)** : T+ - Very toxic
Xn - Harmful
N - Dangerous for the environment

History

- Date of issue/Date of revision** : 1/25/2013.
